Version Control: Git, GitHub

Database: MySQL (Beginner)

Other Tools: Linux, Socket.io

EDUCATION

Bachelor of science

University of Kota

Master of Computer Application

Rajasthan Technical University

ORGANIZATIONS

Comfygen Private Limited

React.js Developer | September 2022 - June 2024 | Jaipur, Rajasthan

- Built **responsive interfaces** using React.js and Tailwind CSS.
- Utilized Redux for efficient state management and enhanced application scalability.
- Integrated React components with backend APIs for seamless data exchange.
- Optimized React applications for improved performance metrics.
- Contributed to high-impact projects, significantly improving user experience.

Digital Future Web Solution

React.js Developer | July 2024 - Present | Jaipur, Rajasthan

- Designed and implemented **user-friendly interfaces** for dynamic web applications.
- Leveraged React.js to create reusable components, improving development efficiency.
- Collaborated with designers and developers to meet UI/UX requirements.
- Conducted code reviews and resolved complex technical issues.

PROJECTS

Fit Club is a web application built using React.js, designed to streamline the process of creating professional resumes. It offers users an intuitive interface to input their personal details, work experience, education, skills, and more, generating a polished resume ready for download or sharing.

User-friendly Interface: The app provides a clean and user-friendly interface, guiding users through the resume creation process step by step.

Dynamic Sections: Users can easily add, remove, and rearrange sections according to their preferences, ensuring a customizable and tailored resume.

Responsive Design: The app is built with responsiveness in mind, ensuring compatibility across various devices and screen sizes.

Technologies Used:

React.js: The core framework for building the frontend interface and managing state.

Redux (Optional): Used for state management in larger-scale applications, ensuring a scalable and maintainable codebase.

HTML/CSS: Utilized for structuring the layout and styling the components, ensuring a visually appealing user experience.

JavaScript ES6+: Leveraged for implementing interactive features and enhancing user interactivity.

Investment Project

Created an investment web app with a versatile admin panel, enabling users to manage coin investments, track performance, and analyze data for informed decisions.

Unitrade Telegram Bot Project

A **coin-based system** where users earn and trade coins for real money by completing tasks, payments, and referrals.

Frontend: React.js for a responsive and interactive interface.

Backend: Node.js for scalable operations.

Design: Tailwind CSS for a sleek UI.

Database: MySQL for secure data management.
